- **Sun 12/9** Shepard Coffeehouse! After the traditional primal scream at 9pm, head down to the Piano Lounge for an awesome mini talent show while munching on coffee and cookies @ 9:05pm Piano Lounge

Snowflake Fun Facts:

- Much like human fingerprints, it is thought that no two snowflakes are exactly alike.
- There are six main types of snowflakes: plate (flat), column, stars, dendrite, lacy, needle, and capped column.
- The largest snowflake ever recorded was 15 inches wide and 8 inches thick!
- Apparently there is a name for icky black snow that's mixed with dirt: snirt.
